WARNING AND CAUTION

Make sure to follow the instructions to prevent any danger or property losses.

1. It indicates prohibition.
2. It indicates disassembly.
3. It indicates prohibition of contact.
4. It indicates do and don'ts.
5. It indicates that the plug should be pulled out from the socket.

**Warning**

Death or serious injury is expected.

- Do not touch the plug in the socket when it is wet.
- Do not connect other products when in use. It may cause breakdowns.
- Do not forcibly bend the cord or put a heavy object on the product. It may cause a fire.
- Do not use a salt, flammable, or similar substance. Such substances may ignite or generate heat.
- Do not insert the product in a humid or damp environment, as it may cause an electric shock.
- Do not forcibly pull out the cord from the socket. It may cause a fire or electric shock.
- Do not use a wet cloth to clean the plug. It may cause an electric shock.
Make sure to follow the instructions to prevent any danger or property losses.

**Caution**

An injury or property losses are expected.

- **Symbol:** Indicates prohibition
- **Symbol:** Indicates disassembly
- **Symbol:** Indicates prohibition of contact
- **Symbol:** Indicates do's and don'ts
- **Symbol:** Indicates that the plug should be pulled out from the socket

**Instructions:**

1. **Caution:** Do not pull the power cord. The power cord is not designed to be a handle. To disconnect, pull out the plug from the wall outlet.

2. **Do not put a heavy object on the product.** This may cause a breakdown.

3. **Do not disassemble or give an impact to the product.** This may cause a breakdown.

4. **Avoid direct rays of the sun or heating devices at a time of operation.**

5. **If the product generates strange sound, smoke, or heat,** immediately turn off the product and contact the service center.

Note: Video recording time shall be different when the recording content is different. (In the worst situation, a 2G card can record pictures of 320 x 240 resolution ratio at 1 frame per second for 28 hours, in the best situation, the recording time can be over 72 hours.)

FEATURES AND MAIN FUNCTION

1. Features
   - 7" colour digital LCD
   - Touch screen
   - Hands-free design, perfect intercom with clear voice
   - Surface mounted
   - 4 wire connection
   - Simple operation

2. Main function
   - Lock control
   - Support TF card
   - "Do Not Disturb" function
   - Broadcast function
   - Monitor listening
   - Simple DVR function with motion detection
   - Auto leaving message
   - Video & audio recording
   - Lock control
   - Picture taking with internal flash or TF card
   - Multimedia function: photo frame, music playing
   - Brightness, contrast and colour adjustable
   - Alarm clock and calendar
   - Real time monitoring of doorbell or CCTV camera
   - Make internal call to other monitors
   - Call transfer

Package contents

- Monitor
- User manual
- PIN bi-band
- 24V power supply
- Check card
- 24VAC 5VDC power supply
SYSTEM LAYOUT

1. The port to connect doorbell panel
The system can maximum support 1 main monitor, 3 sub monitors, 2 door panels and 8 CCTV cameras.

2. The port to connect the CCTV camera
The system can maximum support 1 main monitor, 1 door panel, 9 CCTV cameras and 3 sub monitors.

Note: Based on the actual usage, please refer to Page 24 set the port state.

**WIRING DIAGRAM**

Note:
(a) Door panel unlock wiring: electronic lock 1 + external power supply.
(b) Indoor monitor unlock wiring: electronic 2+ bold black cable part.
(c) The terminal of TEL – A/B is only available for the model with telephone module.
**WIRING DIAGRAM**

Note: Each indoor monitor can only view the images from the CCTV connected on its own CCTV port (if the CCTV is connected on main monitor's outdoor panel port, all the monitor can view the images from it).

### NO. | SETTING ITEMS | OPTIONS | NOTE
---|---|---|---
1-9-2 | MONTH DETECTION SENSITIVITY | LOW, NORMAL, HIGH | It means whether the motion detection is start or sensitivity.
1-9-3 | BEGIN TIME | HOUR/MINUTE | 2/25/10 FRAME/S
1-9-4 | END TIME | HOUR/MINUTE | 2/25/10 FRAME/S
1-9-5 | FRAME RATE | 2/25/10 FRAME/S | Related with TF card capacity, PUB
1-9-6 | RESOLUTION | 320 x 240, 640 x 480 | Related with TF card capacity, PUB
1-9-7 | RECORD LOCATION | DOOR 1, DOOR 2 (OPTIONAL), CCTV 1 (OPTIONAL), CCTV 2 (OPTIONAL) |
1-9-8 | SCREEN SAVER TIME | Never/5/10/30/60/90/120/240/480/960 MIN | The screen will be off when the set screen saver time arrives.
2-1(a) | AUTO LEAVING MESSAGE | OFF, ON | |
2-1(b) | ANSWER MODE | MANUAL ANSWER, AUTO ANSWER | Only valid when the device address set O/3/10/1
2-1(c) | CALL TRANSFER | AUTO ANSWER, CALL TRANSFER | Only available for the model with telephone module
2-2 | DEVICE ADDRESS | ROOM 1/2/3/4 | The option will be red if two monitors set the same address
2-3 | PORT STATE | PORT 2 STATE, CCTV1, CCTV3 | Door 2/CCTV3, CCTV1, CCTV3
### INSTALLATION METHOD

1. Refer to relevant wiring diagram for the system you have chosen and ensure you have the correct cable.
2. Determine the monitor installation position:
   - Advised to install at 1.5 ~ 1.6 Meters
   - Advised distance between indoor monitor and doorbell to be at least 350mm
3. Ensure there is no power supply connection before the installation is finished.
4. Take off the bracket from the back of the monitor.
5. Install the bracket on the wall.
6. Connect cables as indicated in the wiring diagram.
7. Fit the monitor onto the bracket.
8. Connect power when doorbell is installed.

CABLE SPECIFICATION

Our system has 2 solutions to unlock the door: Unlock signal from doorbell or unlock signal from the monitor. (The cable shield wire needs to be grounded) When signal from the doorbell, cable specification is:

- Distance between monitor and door station is less than 30 meters, shielded 4 x 0.5mm² cable is available.
- Distance exceed 30 meters, please choose SYV-75-3 coaxial cable for video with another shielded 2 x 0.5mm² cable or professional cable SYV – 75 – 3 + RVVP 2 x 0.5mm².

When signal is from the monitor, cable specification is:

- Distance between monitor and door station is less than 30 meters, shielded 8 x 0.5mm² cable is available.
- Distance exceed 30 meters, please choose professional cable SYV – 75 – 3 + RVVP 4 x 0.5 mm² (recommended).

SYSTEM SETTING

When you enter the system main menu, click \( \) to go to the system settings menu as figure 9,10,11.

Figure 9

OPERATION GUIDE

The system supports five kinds of action types:

1. Click: In multimedia manager interface, clicking anywhere on the blanked place will pop up the related operation menu. Clicking again can hide the menu.
2. Left slide: Left slide on the bottom of the screen can return to the last menu/View last picture.
3. Right slide: Hide the menu in multimedia interface/View next picture.
4. Up slide: In system settings, up slide to next page.
5. Down slide: In system settings, down slide to last page.

When at answering or monitoring state, the below menu will show on the right of the screen.

INCOMING CALL ANSWER

When a visitor presses doorbell, all the indoor monitors in this house will chime simultaneously, the screen will show INCOMING CALL. Click the icon \( \) to talk with the visitor (talk time is 60 seconds). If you want to unlock the door for the visitor, click the \( \) icon, then DOOR UNLOCKED will show on the screen.

1. If there is another incoming call during the conversation, SOMEONE IS VISITING DOOR 2 will display, click the \( \) icon can switch to another visiting.
2. You can transfer your call to other monitors in the system while talking to the visitor; if you want to transfer the call to others, click the \( \) icon can transfer the call. (The words TRANSFERRING TO OTHER ROOMS will display).
TALKING VOLUME/ADJUST

At talking/intercom state, click the icon to enter volume adjust screen, then click + or – to adjust the volume.

BRIGHTNESS/COLOUR/CONTRAST ADJUST

When the screen is on, click the icon to adjust the volume first, then click it again and you can enter the BRIGHT/COLOUR/CONT adjust screen, click + or – to adjust the brightness, color and contrast.

MONITOR DOORBELLS/CCTV CAMERA

At standby state, click to enter system main menu, then click the icon, you can view images from the connected doorbell/CCTV. Click the icon again you can switch to other monitor channels. When monitoring the doorbell, click the icon to change into (MUTE STATE). If the microphone is in normal state, click the icon to open the door.

If you have more than one monitor (up to 4 monitors) In your house, you can make below operations.

INTERNAL CALL AMONG MONITORS

If you make intercom request for all monitors, at standby state, click to enter system main menu, then click the icon. If you have more than 2 monitors connected together, you can click the target monitor NO on the screen to confirm the calling.

BROADCAST FUNCTION

This function allows you to broadcast information to all monitors in your house. At standby state, click to enter system main menu, then click the icon, the screen will show BROADCAST REQUEST, the monitor in other rooms will show BROADCASTING. Now you can broadcast.

11

20
a) Press # on the phone to talk with the visitor. Talking time: 50 seconds (Max).
b) Press ** on the phone to hang up the call.
c) Press 00 on the phone to unlock the door.

**SYSTEM MAIN MENU**

At standby state, press 8 to enter system main menu as Figure 8.

---

**MONITOR LISTENING**

To activate listening of another monitor, click 1 to enter system main menu, then click the icon 17. If you have more than 2 indoor monitors, click on the target monitor NO. on the screen to confirm. Display of your monitor will show "LISTENING TO OTHER". The maximum monitor listening time is 8 hours.

Note: CAN BE MONITORED function should be enabled in SYSTEM SETTINGS of the target monitor. If you want to deny listening of your monitor from another monitors, disable CAN BE MONITORED function in the system.

**CAPTURE IMAGES**

1. Automatic image capturing: "Auto capture quantity" should be set as 1, 2 or 3 in the SYSTEM SETTINGS. The system can automatically take and save pictures when the doorbell rings.

2. Manual image capturing: When at answering and monitoring state, click the icon to capture images manually before answer. The words IMAGE CAPTURED will show on the screen.

**DVR FUNCTION**

Automatic DVR function: Enable DVR in SYSTEM SETTINGS --> DVR SETTINGS to activate that function. You can record video from any doorbell or CCTV camera in your system at a set time.

Note:
(a) If MOTION DETECTION SENSITIVITY is set to be LOW/NORMAL/HIGH, the system will record only when motion detected and last for 10 minutes after that, then it will stop recording, until another motion is detected.

(b) Sound doesn’t record in DVR function.

(c) DVR function cannot work when the TF card is less than 2G. For 2G TF card, it can only work at 1 frame/second with resolution of 320 x 240. For longest recording time and other parameters, please refer to Page 27.

(d) To activate DVR function, please use the TF card with capacity no less than 8G.
(a) For a high quality video, we recommend 640 x 480 resolution.
(b) When the start time and the end time are set as the same time, the DVR function will activate in 24 hours immediately and last forever.
(c) For detailed information of DVR function, please refer to Page 20, 23, 24.

MANUAL VIDEO RECORDING

When at the answering and monitoring state, click the \(\square\) icon to record video manually. Click the \(\square\) icon again to end the recording.

Note: View and manage video files. Please refer to Page 16, 17.

AUTO LEAVING MESSAGE

This function lets your visitors leave a video message for you while nobody is at home. You should activate AUTO LEAVING MESSAGE or MANUAL ANSWER function in the SYSTEM SETTINGS before leaving home to activate this function. When the visitor presses call button on the door panel and nobody answers before the chime time ends, visitor can hear a voice: "Hello, no one is at home at the moment, please leave a message after the tone" from the door panel and have 20 seconds to leave a message for you.

Notes: View and manage messages and more operation, please refer to Page 16, 17.

FAMILY AUDIO MESSAGE

You can record an audio message to your family. At standby state, click \(\square\) to go to the system main menu, then click the \(\square\) icon to enter message recording menu as Figure 1.

4. View multimedia files: click the \(\square\) icon to review multimedia files. You can review pictures and play music follow the above steps (Review photo).

Note: When there is no TF card inserted, you can review the pictures in the internal flash. If a TF card inserted, you can review the pictures in the internal flash, if a TF card is inserted, you can view the pictures saved in the TF card.

DELETE SINGLE FILE OR FOLDER

If you want to delete a file or folder, you can select the single file or folder in the list, then click the \(\square\) icon (Delete) to enter the screen as Figure 7.

Click DELETE to delete the selected file or folder.

Note: It’s the same operation to delete image, audio and DVR files.

TRANSFER OUTDOOR PANEL’S CALL TO TELEPHONE/MOBILE

(only available for the model with telephone module)

1) Go to \(\square\) system settings and set ANSWER MODE to CALL TRANSFER (only available for master monitor). Then click PHONE NUMBER SETTINGS and enter phone number, which the call will be transferred to. If you want to add a pause during dialing, insert a letter "P", which means 1 second pause during dialing, if want longer pause, please add more "P" in the telephone no.

2) If no one answers during CHIME TIME, the call will be transferred to the set telephone. "TRANSFERING TO TELE" will display on the monitor’s screen while transferring.

3) After picking up the call, the user will hear the chimes from the door panel.
Click the or icon to view the images. The image will automatically change in every 5 seconds. If you want to exit, click the icon can return to the last menu.

2. Review video: Click to enter the video list, select the video file to enter Figure 6.

You can click the related icon to play the video, click the icon to exit.

3. Play DVR: Click the icon to enter DVR files. The operation steps are the same as above (Review video).

Click "RECORD" to start recording. When the recording is finished, click "STOP" to stop recording. If your message was recorded successfully, then click "EXIT" to exit the recording menu.

Note: View and manage messages and more operation, please refer to Page 14, 15, 28.

CHANGE ATTENTION FOR AUTOMATIC ANSWERING FUNCTION

When AUTO LEAVING MESSAGE or MANUAL ANSWER is on, if nobody answers the call before chime time ends, the caller will hear a voice attention message: no one is at home at the moment, please leave a message after the tone? If the user wants to change this attention message (BEGINNING TONE) into their own sound, please take the following steps:

Go to the menu and record one audio message, then exit menu and enter menu as Figure 2.
ALARM CLOCK AND ELECTRONIC CALENDER

1. Enable ALARM CLOCK SETTING in the SYSTEM SETTINGS.
2. At the set time, you can turn off the alarm by clicking the chime icon at the left corner of the screen.
3. When Figure 4 displays on the screens, click the alarm clock (the left corner) and the display time (the right corner), you can set the alarm clock and calendar in the shortcut way.
4. Please refer to Page 25, 26 for detailed settings.

VIEW PHOTO, VIDEO, DVR AND MULTIMEDIA FILE

At standby state, press \( \) button to go to system main menu. If you have unread files, there will be a number on the right corner of the icon with red color, the number is the unread files' quantity. All files' names consist of the date and time it was created, for example: 2013-02-01 11:30:20, means that files was created at 11:30:20, Feb, 1st, 2013. So it's very convenient for you to know the recording time and identify different files

1. View photo: click the \( \) icon to view image files, click the file’s name then you can see the image as Figure 5.
